

Information for Pharmacists

14th Nov 2022

Summary: Besins Healthcare is taking action to further boost supply of Oestrogel® (Oestrogel Pump-Pack 750 micrograms/actuation Gel) Pump-Pack in the Republic of Ireland- PA 1054/004/001

To boost supplies of Oestrogel Pump-Pack, Besins Healthcare is introducing an additional cylindrical bottle of Oestrogel for the Irish market, as shown in the pictures below.

The introduction of the cylindrical shaped bottle with the white lid (right of picture) allows us to increase supplies into Ireland. The current bottle, which will continue to be supplied, is the conical shaped bottle with the blue lid (left of picture). Supplies of the new bottle will greatly enhance our ability to meet the rising demand we are experiencing and will help increase the availability of Oestrogel in Ireland.

Please be assured that all Oestrogel products have the same qualitative and quantitative composition. Dosing remains the same for both bottles.

From mid November 2022, both presentations of Oestrogel Pump-Pack will be supplied using the same product description in Ireland.

Conical Bottle (current pack)

Cylindrical Bottle (additional pack)

This means that your pharmacy could receive either or both of these packs in a delivery from the wholesalers. We are providing, on request, patient tear off leaflets for you to give to your patients that have been prescribed Oestrogel. The leaflet explains the different bottle shapes and assures patients that the medicine contained within the pack is the same in both bottles. If you require the leaflets please email information@besins-healthcare.com.

If you have any questions, please contact Besins Medical Information at email: besins@eu.propharmagroup.com or call +353 (0)1-4004466.
